Woodinville, WA | 206-375-0324 | changchiatze@gmail.com | linkedin.com/in/chiatze-chang

SUMMARY

Data Scientist with 5+ years of experience building and deploying statistical and machine learning models (classification, regression, clustering, segmentation) across tech and e-commerce. Delivered Airflow-orchestrated production ML that drove a 1.5× conversion uplift, 3× click-through rate, and a 49% reduction in customer acquisition cost. Hands-on with SQL and Python (pandas, scikit-learn) for data extraction, exploratory analysis, and modeling, and skilled at presenting findings to both technical and non-technical audiences.

TECHNICAL SKILLS

Languages & Tools: Python (pandas, scikit-learn, XGBoost, NLTK), SQL, R, SAS
Statistics & ML: Statistical Modeling, Linear Regression, Classification, Clustering, Customer Segmentation, Predictive Modeling, Propensity Modeling, PCA, SVM, Neural Networks, NLP, A/B Testing, Statistical Testing
Model Development & Deployment: EDA, Data Wrangling, Model Validation (Precision/Recall, Backtesting on Historical Data), Airflow-Orchestrated Production ML Deployment, Model Monitoring
Data Engineering: ETL Pipelines, Data Quality & Validation, API Integration
Data Storytelling & BI: Power BI, Tableau, Executive Dashboards, Stakeholder Presentations

WORK EXPERIENCE

Data Scientist (Contract) | SiriusMindShare Lab · San Jose, CA *Oct 2025 – Mar 2026*

- Built NLP text classification and sentiment models (including LLM API-assisted feedback tagging) and applied statistical modeling to user feedback data to extract behavioral patterns, directly informing product feature prioritization and roadmap decisions.
- Built and documented reproducible Python workflows for data preprocessing, wrangling, and EDA, improving team efficiency and analytical consistency.

Senior Data Analyst (Insight Planner) | LINE Taiwan Limited · Taiwan *Jan 2022 – Jun 2025*

- Led predictive modeling and customer segmentation initiatives (classification, propensity modeling, XGBoost) to identify high-value user cohorts, achieving a 1.5× increase in product conversion rate.
- Designed and deployed a context-aware recommendation system using supervised learning and scenario-based features, validating models with precision/recall and backtesting on historical data before live experiments, driving a 3× increase in click-through rate (CTR).
- Developed statistical and ML models for marketing optimization including repurchase prediction and coupon sensitivity analysis, reducing Customer Acquisition Cost (CAC) by 49% while sustaining user engagement.
- Built and maintained scalable end-to-end data pipelines and ETL workflows in Python, with Airflow-orchestrated production ML deployment and model monitoring, supporting 21M+ daily users and enabling real-time experimentation and personalized multi-channel targeting.
- Performed EDA and deep-dive funnel and product analysis using SQL and Python across subscriptions, user behavior, and lifecycle metrics, presenting findings to non-technical stakeholders to surface conversion bottlenecks and retention opportunities.

Data Engineer | Topco Scientific Co., Ltd. · Taiwan *Mar 2021 – Dec 2021*

- Designed NLP-powered customer insights pipelines to extract sentiment trends and behavioral patterns from unstructured feedback and third party data, supporting marketing strategy decisions.
- Engineered and maintained scalable ETL workflows in Python integrating external APIs and internal data systems, eliminating manual reporting and saving 184+ hours per month.
- Built real-time executive dashboards in Power BI to visualize KPIs, experiment results, and trend analyses, presenting insights to support weekly business and leadership reviews.

Data Analyst | EVA Airways Corp. · Taiwan *Aug 2018 – Feb 2021*

- Developed large-scale customer segmentation models on 1M+ records using clustering and statistical techniques, powering personalization, lifecycle management, and loyalty program campaigns.
- Built predictive analytics models to optimize marketing campaigns, resulting in a 2× increase in email open rates (20% to 40%) and significantly improved campaign ROI.

EDUCATION

Data Science & Data Analytics Certification *Jun 2025 – Mar 2026* | UC Santa Cruz Silicon Valley Extension
M.S. Management Science *Sep 2016 – Jun 2018* | National Chiao-Tung University
B.S. Statistics *Sep 2012 – Jun 2016* | National Cheng-Chi University
